Welfare Update 3G

A number of people have asked why parents cannot be inside the 3G at training or matches.

It's very simple. Due to the design of the Stanley Park 3G and no run off area being big enough to create a permanent barrier like at Poolfoot, it's a safeguarding issue.

As a physical barrier does not exist between parents and the players/referee, then there is a duty of safeguarding responsibility for the club.

There is also the enjoyment aspect for both players and coaches. Kids thrive without the constant shouting and pressure from the touchline. We also want them to be able to hear their coaches that put so much into helping them develop and not misguided instruction from parents/carers.

This is a club stance and one backed by the Leagues and Sports Centre to enjoy the game and create a safe environment.

Please circulate this message throughout your groups so everyone is clear on this subject. Please also highlight this to your opposition.
